

24 Way PDU 32A with 20 C13 + 4 C19 Sockets, 2 Circuit Breakers 16A and 3 Mtr IEC60309 type Power Cord

Avalon Power Distribution Units (PDU's) are used for controlling electrical power in the Data Center. 24 Way PDU has 20 sockets of C13 type and 4 sockets of C19 type and 2 Circuit breakers of 16A and has 3 meter long power plug of IEC60309 standard.

Features and Benefits

Main Function	Description
Installation method	Vertical installation / cable bottom(rearleft)
Mounting brackets	- 70 round hole flap (1 u); - 70 without baffle hole (1 u)
Power input method	32A IEC60309 plug ; 3 * 6.0 mm squared the power cord 【3M】 (Non RVV)
Functional module	1P 16A circuit breaker 【2】
Output unit	C13 unlocked socket-1U 【20】 ; C19 unlocked socket - 1 u 【4】
Housing Color	Black
Product size specifications	H x W x H = 1496*44.4*44.4 (mm) ±2mm
Fixed hole center distance	1456 mm
Profile length	1356 mm
Cable fixing method	PG terminal (normal)
Rated voltage	220 - 250 v 50/60HZ
Rated current	32A
Rated power	8000W
