

24 Way Smart PDU 32A with 20 C13 + 4 C19 Sockets and 3 Mtr IEC60309 Type Power Cord

Avalon Power Distribution Units (PDU's) are used for controlling electrical power in the Data Center. Smart PDU which has 24 Sockets where 20 Sockets are C13 and 4 Sockets are C19. The power plug is IEC60309 whose length is 3 Mtr.

Features and Benefits

Monitor Total load current Input Voltage Total apparent power (kVA) /power factor/active power(kW) Total energy consumption (kWh) AC power frequency Temperature & humidity status (Optional) Configure Set the email alarm address Set the threshold of total load current Set SNMP(v2c) Set SNMP(v2c) Set network parameters(IP, gateway, subnet mask, DNS) Threshold of total current is exceeded Alarm System Default When overload occurs Buzzer beeping Send E-mail to administrator automatically (Optional) SNMP sends trap alarm information Central User Management Single user, user name and password configurable
Total apparent power (kVA) /power factor/active power(kW) Total energy consumption (kWh) AC power frequency Temperature & humidity status (Optional) Configure Set the email alarm address Set the threshold of total load current Set HTTP(s) Set SNMP(v2c) Set network parameters(IP, gateway, subnet mask, DNS) Threshold of total current is exceeded Alarm System Default When overload occurs Buzzer beeping Send E-mail to administrator automatically (Optional) SNMP sends trap alarm information Central Total apparent power (kVA) /power factor/active power(kW) Total energy consumption (kWh) AC power frequency Temperature & humidity status (Optional) Set the email alarm address Set the threshold of total load current Set HTTP(s) Set SNMP(v2c) Set set network parameters(IP, gateway, subnet mask, DNS) Threshold of total current is exceeded Alarm System Default System Default System Default System Default System Default Support central management of N units
Total energy consumption (kWh) AC power frequency Temperature & humidity status (Optional) Configure Set the email alarm address Set the threshold of total load current Set HTTP(s) Set SNMP(v2c) Set network parameters(IP, gateway, subnet mask, DNS) Threshold of total current is exceeded Alarm System Default When overload occurs Buzzer beeping Send E-mail to administrator automatically (Optional) SNMP sends trap alarm information Central Support central management of N units
Total energy consumption (kWh) AC power frequency Temperature & humidity status (Optional) Configure Set the email alarm address Set the threshold of total load current Set HTTP(s) Set SNMP(v2c) Set network parameters(IP, gateway, subnet mask, DNS) Threshold of total current is exceeded Alarm System Default When overload occurs Buzzer beeping Alarm Method Send E-mail to administrator automatically (Optional) SNMP sends trap alarm information Central Support central management of N units
Temperature & humidity status (Optional) Set the email alarm address Set the threshold of total load current Set HTTP(s) Set SNMP(v2c) Set network parameters(IP, gateway, subnet mask, DNS) Threshold of total current is exceeded Alarm System Default When overload occurs Buzzer beeping Send E-mail to administrator automatically (Optional) SNMP sends trap alarm information Central Support central management of N units
Configure Set the email alarm address Set the threshold of total load current Set HTTP(s) Set SNMP(v2c) Set network parameters(IP, gateway, subnet mask, DNS) Threshold of total current is exceeded Alarm System Default When overload occurs Buzzer beeping Send E-mail to administrator automatically (Optional) SNMP sends trap alarm information Central Support central management of N units
Set the threshold of total load current Set HTTP(s) Set SNMP(v2c) Set network parameters(IP, gateway, subnet mask, DNS) Threshold of total current is exceeded Alarm System Default When overload occurs Buzzer beeping Send E-mail to administrator automatically (Optional) SNMP sends trap alarm information Central Support central management of N units
Set HTTP(s) Set SNMP(v2c) Set network parameters(IP, gateway, subnet mask, DNS) Threshold of total current is exceeded System Default When overload occurs Buzzer beeping Buzzer beeping Send E-mail to administrator automatically (Optional) SNMP sends trap alarm information Central Support central management of N units
Set SNMP(v2c) Set network parameters(IP, gateway, subnet mask, DNS) Threshold of total current is exceeded System Default When overload occurs Buzzer beeping Send E-mail to administrator automatically (Optional) SNMP sends trap alarm information Central Support central management of N units
Set network parameters(IP, gateway, subnet mask, DNS) Threshold of total current is exceeded System Default When overload occurs Buzzer beeping Send E-mail to administrator automatically (Optional) SNMP sends trap alarm information Central Support central management of N units
Alarm System Default When overload occurs Buzzer beeping Send E-mail to administrator automatically (Optional) SNMP sends trap alarm information Support central management of N units
Alarm System Default When overload occurs Buzzer beeping Send E-mail to administrator automatically (Optional) SNMP sends trap alarm information Central Support central management of N units
Alarm Method Buzzer beeping Send E-mail to administrator automatically (Optional) SNMP sends trap alarm information Central Support central management of N units
Alarm Method Send E-mail to administrator automatically (Optional) SNMP sends trap alarm information Central Support central management of N units
SNMP sends trap alarm information Central Support central management of N units
Central Support central management of N units
Support central management of 14 anits
User Management Single user, user name and password configurable
one was a series and passed a series and passed as a series and pass
Web based, access via IP
SNMP v2c
Access method Serial access (Modbus)
Telnet
Daisy chain Support daisy chain 32 units at most (via Modbus, must be combined with RS485)
Software system Support web browsers like IE, Firefox, and Google etc.

	Rated input voltage		220-250V 50/60 Hz			
Input	Input terminal type		IEC60309 plug			
	Cable specification		3x6mm ²			
	Cable length		3 meters			
	Rated current		32A			
	Overload protection		2x16A circuit breaker			
	Outlet standard	C13 lockable	Rated current	10A	Outlet quantity	20
	Outlet standard	C19 lockable	Rated current	16A	Outlet quantity	4
Output	Surge protector		N/A			
	Rated output voltage		220-250VAC			
	Display		True color LCD, display input voltage, total current, total power(kW), energy consumption(kWh) and IP			
	Dimension		L×W×H =1747×44.4×44.4mm			
Physical characteristics	Case material		Aluminum			
	Case color		Black			
Environment characteristics	Working environment		Temperature: -20-85°C, relative humidity 0-95%			
	Storage environment		Temperature:-20-85°C, relative humidity 0-95%			
Installation	Back side brackets installation					
	Tool-less mounting (optional)					
Fittings	4pcs φ6×16mm cross bolt, 4pcs M6 float nut.					

Ordering Information

Part No.	Description
AN-24W-SMTPDUC13-C19-32A	24 Way Smart PDU 32A with 20 C13 + 4 C19 Sockets and 3 Mtr IEC60309 Type Power Cord
