

Caster with 2 inch Swivel Plate Brake

Avalon's swivel casters are designed, so that the wheel in the caster can rotate 360 degrees while under load. As the center hub of the wheel revolves around the center of the swivel section it is said to "cast" in that small circle. Thus, caster! This essential swiveling feature of casters makes it so much easier to move heavy loads and turn tight corners in a warehouse

Features & Benefits

- Material: Wheels Pole Urethane
- Suitable for furniture, electrical appliances, office furniture/home/hardware
- Environmentally friendly and wear-resistant material, working smoothly and silently with unique design
