

Multidirectional Anti-Vibration Shock Mounts for Floor Standing Racks

Avalon's multi-directional Anti-Vibration Shock Mounts, these isolators include great features, such as their wide temperature range, high adaptability and resonance frequency up to 14 Hz and are suitable for static loading per mount of 30 to 1,200 Kg

Features

- Multi-directional shock/vibration isolation
- Displacement under shock up to 38 mm (depending on model)
- Transmissibility: $Q < 6$ or $Q < 10$
- Resistance at 3g static under max. load
- Resonance frequency up to 14 Hz
- Resonance excitation range up to 1.25 mm
- Usage temperature: -30°C to $+100^{\circ}\text{C}$
- Highly adaptable: special models on request (materials, size and interfaces, etc.)

Ordering Information

Part No	Description
ANV-DMR-M12-145X56	Multidirectional Anti-Vibration Shock Mounts for Floor Standing Racks (Size: M12, L : 145mm, H : 56mm)
