

Universal Blank Panel Tool-Less (Snap-in)

Avalon’s tool-less blanking panels are part of the energy-saving airflow management solutions for all data centers. They are designed to reduce bypass airflow in cabinets while providing a desirable appearance. The tool-less blanking panel has design features that help to speed installation and is part of the complete range of cooling accessories available from Avalon to help maximize control of the physical infrastructure. The tool-less pass-through blanking panels have design features that help speed installation and allow cables to pass from the front to the back of cabinets

Application

19" Horizontal Tool-less (Snap-in) Blank Panels are ideal for installations where open or expansion rack space is to be covered. Unused rack openings shall have blanking panels installed to reduce bypass airflow through open spaces in racks and cabinets. Panels shall be designed of non-metallic material.

Material

It is made of thermal plastic material with a low-gloss textured black finish. It is used with tapped or square EIA universal spaced rack mounting angles.

Standards

19" (482.6mm) width meets CEA-310-E standards
