Vertical Cable Management Tray for Enclosure Rack

Vertical cable management tray runs vertically from the top to bottom of the server cabinet and allow you to route cables to data switches or UPS devices in a structured manner. They come in 3 different sizes to complement our range of premium server cabinets, and you can mount one or two on either side of the cabinet. It allows you to secure and route the equipment and network cables in a neat and organized manner, but this stops at the sides of the server. To route these cables in the rack in the same manner, Vertical Cable Management Trays are required.
